To Whom May Be Concerned:

When first approached by Mike Biegel, Energy Consultant with Alliance Energy Solutions, we were a little skeptical that our fifty-year-old building could be economically retrofitted with new energy-efficient light fixtures. After in-depth meetings with Mike and after our accountant and office manager performed due diligence by investigating the company and other customers' results, we were sufficiently convinced to enter into agreement with Alliance.

This relationship proved to be an excellent decision as the installation crew arrived on schedule and performed in a courteous and workmanlike manner. Our assigned project manager, Gerard Cote, was always responsive. He worked closely with us to create an improved layout of lighting fixtures to enhance the quality and coverage of lighting in our 15,000sf studio and offices. We are thrilled and quite satisfied with the results.

Our re-lighting project was executed with professionalism and thoroughness throughout the process. Detailed walkthroughs were done and then doublechecked to ensure accuracy. Mike and Gerard were always accessible to answer questions and offer solutions. I would confidently recommend Alliance Energy Solutions.

Sincerely,

Peter Zsiba
Principal
