Dear Anthony:

Jamie and I are delighted with the installation and operation of our new energy saving lighting system at the Brewster Sports Center. The new lights are a perfect complement to our facility, and we have heard nothing but raves from players and coaches about the visibility and clarity provided by these lights. The best part of the deal is that we are saving significantly on the cost of lighting the facility, between 40-50%. In addition, the NYSERDA rebates afforded us a solid financial incentive to proceed.

We were most impressed with the professional installation, which took place based on our awkward schedules. Nonetheless the crews were there when promised, and completed the work exactly on schedule. We did not experience a single minute of interruption to our business, which was just outstanding.

Do know that we very much appreciate that through the installation of the lightning systems you recommended, our facility stands out as one of the finest indoor sports arenas in the tri-state region. THANK YOU!

Yours truly,

Franco Foti
President
